

Kiran A B

Tech Lead & Full-Stack Engineer

Bengaluru, Karnataka, India +91 9738000271 Kiran.28sep@gmail.com
www.linkedin.com/in/kiran-a-b-62ba6154/ github.com/KiranAB2809

PROFILE SUMMARY

- Accomplished Tech Lead with 9+ years of full-stack development experience, driving innovation in core banking and enterprise systems.
- Strong command over Java Spring Boot, ReactJS, cloud technologies (AWS, Kafka), and modern DevOps practices.
- Extensive hands-on experience in Agile methodologies and SAFe framework implementation.
- Proven ability to lead high-performing teams while delivering scalable, production-grade applications.
- Continuous learner with demonstrated expertise in emerging technologies and architectural best practices.

TECHNICAL SKILLS

Backend & Cloud: Java / Spring Boot, Microservices Architecture, AWS (EC2, S3, EKS), Apache Kafka, PostgreSQL / SQL Server	Frontend: ReactJS, JavaScript (ES6+), TypeScript, Angular, HTML / CSS
DevOps & Delivery: CI/CD & Jenkins, Docker / OpenShift, Kubernetes Basics, SAFe / Agile / Scrum, Technical Leadership	

PROFESSIONAL EXPERIENCE

Software Engineer — Tech Lead, Designer & Full Stack Developer	November 2020 – Present
<i>ANZ Operations and Technology</i>	<i>Bengaluru, India</i>
In the Institutional Banking department, I hold the roles of Tech Lead, Designer, and Full Stack Developer. Primarily responsible for developing and maintaining core banking web-based applications tailored for Institutional Bankers. • Architecting and developing backend microservices using Java Spring Boot with focus on scalability and performance • Designing and implementing responsive frontend solutions using ReactJS • Managing DevOps operations including CI/CD pipeline optimization and deployment automation • Mentoring junior developers and conducting technical code reviews to maintain code quality • Collaborating with stakeholders to translate business requirements into technical solutions • Implementing cloud-based solutions using AWS services for improved scalability and reliability • Led ORION project refactoring, modernizing legacy banking systems with the latest technology stack • Optimized application performance resulting in 40% reduction in response times • Implemented event-driven architecture patterns using Kafka for real-time data processing • Established best practices for microservices development and deployment Tech: Java, Spring Boot, ReactJS, AWS, Kafka, OpenShift, PostgreSQL	

Software Engineer

Volvo Group India Private Limited

November 2016 – November 2020

Bengaluru, India

Full-stack software developer responsible for gathering requirements from stakeholders and developing solutions with rich UI and user-friendly interfaces. Core focus on API integration and functionality development according to specifications.

- Gathered requirements directly from stakeholders and translated them into working software
- Built rich, user-friendly interfaces across multiple mission-critical applications
- Focused on API integration and functionality development according to specifications
- Supported global operations across Volvo Trucks, Volvo Buses and Mack Trucks
- Awarded SPOT Award for dedication and commitment to excellence
- Awarded Volvo IT Star Award for technical excellence and innovation
- Runners-Up in Hackathon 2017 and Hackathon 2018 (Volvo IT Ignite)
- Developed multiple mission-critical applications supporting global operations

Tech: Angular 4, TypeScript, ReactJS, C# MVC API, Docker, OpenShift

PROJECT EXPERIENCE

ORION

November 2020 – Present

ANZ Institutional Banking

ORION is a pivotal core banking application within ANZ Institutional Banking undergoing comprehensive refactoring, rebuilt from the ground up using advanced technology stacks.

- Tech Lead and Designer for the project, setting technical direction and standards
- Architected microservices-based backend using Spring Boot and AWS services
- Implemented Kafka-based event streaming for real-time transaction processing
- Spearheaded development of user stories and technical implementation planning
- Overseeing DevOps process including CI/CD pipeline improvements and cloud deployment
- Contributed to knowledge sharing initiatives, enhancing team productivity
- Demonstrated ownership of tasks from development through production deployment
- Mentored junior developers on microservices architecture and cloud best practices
- Impact: Resulted in minimal defects and established this as the reference architecture for future ANZ projects.

Tech: ReactJS, Spring Boot, AWS, OpenShift, Kafka, PostgreSQL

NAMS

August 2018 – November 2020

Volvo Group — New After Market Service Integration System

NAMS is a centralized integration system for Volvo aftermarket operations. NAMS Information Center (NIC) provides comprehensive visibility of NAMS operations, clients, and subsystems.

- Frontend development using ReactJS with focus on performance and usability
- Designed and implemented visually appealing graphical user interfaces
- Developed real-time status monitoring and alerting systems for subsystems
- Proficiently handled API development and seamless front-end integration
- Collaborated with cross-functional teams to ensure system reliability
- Impact: Gave operations teams live visibility into NAMS clients and subsystems for the first time.

Tech: ReactJS, C# MVC API, Docker, OpenShift

Vehicle Data Administration (VDA+)

November 2016 – August 2018

Volvo Group

Central Volvo system providing unified access to vehicle information across Volvo Trucks, Volvo Buses, and Mack Trucks. Enables read/write access to VDA data with capabilities for vehicle data modification, VIC card printing, and report generation.

- Frontend development using Angular 4 with focus on data handling and user experience
- Seamlessly integrated APIs and implemented functional components per specifications
- Designed Angular structures and models for organized application architecture
- Directly liaised with stakeholders for requirements gathering and implementation
- Ensured high code quality and maintainability standards
- Impact: Unified vehicle data access across three brands into a single, maintainable application.

Tech: Angular 4, TypeScript, C# MVC API

EDUCATION

Bachelor of Engineering — Information Science and Engineering	July 2016
Acharya Institute of Technology, Visvesvaraya Technological University	72.4% aggregate
Pre-University Course — Computer Science	July 2012
St. Joseph's PU College	80.4% aggregate
Secondary School Leaving Certificate (SSLC)	May 2010
St. Ann's High School	72.7% aggregate

AWARDS

SPOT Award	2016–2020
Volvo Group — For dedication and commitment to excellence	
Volvo IT Star Award	2016–2020
Volvo Group — For technical excellence and innovation	
Runner-Up, Hackathon 2017	2017
Volvo IT Ignite	
Runner-Up, Hackathon 2018	2018
Volvo IT Ignite	

PERSONAL DETAILS

Date of Birth: 28 September 1994

Nationality: Indian

Location: Bengaluru, Karnataka

Languages: English, Kannada, Telugu

Interests: Photography, Travelling, Technology Innovation
